TRENDS IN BIOTECHNOLOGY

REFERENCE EDITION

Volume 8

1990

CONTENTS

JANUARY

Undercurrents
Production of peptides in plant seeds,
by Enno Krebbers and Joel Vandekerckhove 1
Peptide-mediated formation of quantum semiconductors,
by Charles T. Dameron and Dennis R. Winge 3

Feature
Improvement of wool production through genetic engineering,
by George E. Rogers 6

Reviews
Affinity chromatography supports: a look at performance requirements,
by Sunanda R. Narayanan and Laura J. Crane 12
Protein engineering for thermostability,
by Yoshiaki Nosoh and Takeshi Sekiguchi 16
Vaccinia virus: a versatile tool for molecular biologists,
by Jeffrey N. Miner and Dennis E. Hruby 20
Antibiotics from within: antibacterials from human and animal sources,
by Peter Elsbach 26

Books received 30

FEBRUARY

Feature
Patents and technology transfer,
by Jerry A. Weisbach and Henry T. Burke 31

Reviews
HIV-1 testing: product development strategies,
by Toby D. Gottfried and Howard B. Urnovitz 35
Approaches to HIV vaccine design,
by Dani P. Bolognesi 40
Bioconversions of aliphatic compounds by *Pseudomonas oleovorans* in multiphase bioreactors: background and economic potential,
by Bernard Witholt, Marie-José de Smet, Jaap Kingma, Jan B. van Beilen, Menno Kok, Roland G. Lageveen and Gerrit Eggink 46
Protein-based medical adhesives,
by Robert L. Strausberg and Rebecca P. Link 53

Letter
Genetic resource corrections,
by D. H. Van Sloten, M. C. Perry and J. Konopka 57

MARCH

Workshop
Polypeptide growth factors – a growth area for biotechnology,
by C. Jane Robinson 59

Reviews
Engineering herbicide tolerance into crops,
by Elli Oxtoby and Monica A. Hughes 61
Why use air-lift bioreactors?
by José C. Merchuk 66

Alginate as immobilization matrix for cells,
by Olav Smidsrød and Gudmund Skjåk-Bræk 71
Supercritical fluid extractions in biotechnology,
by Theodore W. Randolph 78

Letters
Estimating the immeasurable without mechanistic models,
by Gary Montague, Ming Tham and Paul Lant 82
Reply,
by R. T. J. M. Van Der Heijden and K. Ch. A. M. Luyben 83

Book Review
Targeted Therapeutic Systems (edited by P. Tyle and B. P. Ram),
by B. E. Souberbielle and M. E. R. O'Brien 84

APRIL

Undercurrents
Adenoviruses as expression vectors and recombinant vaccines,
by Frank L. Graham 85

Reviews
Engineering proteins for purification,
by Helmut M. Sassenfeld 88
Measuring and increasing protein stability,
by C. Nick Pace 93
Prospects for genetic diagnosis of inherited predisposition to cancer,
by Bruce A. J. Ponder 98
Microbial isopenicillin N synthase genes: structure, function, diversity and evolution,
by Gerald Cohen, Dov Shiffman, Moshe Mevarech and Yair Aharonowitz 105

Book Review
Protein Purification Methods: A Practical Approach (edited by E. L. V. Harns and S. Angal),
by Christine Ayling 112

MAY

Undercurrents
Thaumatin II – a palatability protein,
by Michael Witty 113

Reviews
Gene expression and the development of live enteric vaccines,
by Ian Charles and Gordon Dougan 117
The biotechnology of cultivating the halotolerant alga *Dunaliella*,
by Ami Ben-Amotz and Mordhay Avron 121
Protein-catalysed protein folding,
by Arthur L. Horwich, Walter Neupert and Franz-Ulrich Hartl 126
Biomaterials aspects of porous microcarriers for animal cell culture,
by Frederick Cahn 131

Book Reviews
Managing Creativity in Science (by R. Kay),
by Winston J. Brill 136
Algal and Cyanobacterial Biotechnology (edited by R. C. Cresswall, T. A. V. Rees and N. Shah),
by Daniel James Gilmour 137

Books Received 137

JUNE

Workshop
Getting the best from plants,
by Joan Marsh 139

Undercurrents
Complementarity of peptides specified by 'sense' and 'antisense' strands of DNA,
by J. Edwin Blalock 140

Reviews
Soybean genetic engineering – commercial production of transgenic plants,
by Paul Christou, Dennis E. McCabe, Brian J. Martinell and William F. Swain 145
Scanning tunnelling microscopy in biotechnology,
by Patricia G. Arscott and Victor A. Bloomfield 151
Manipulation of methionine-rich protein genes in plant seeds,
by Susan B. Altenbach and Robert B. Simpson 156
Fiber optic evanescent wave immunosensors for medical diagnostics,
by Barry I. Bluestein, Irene M. Walczak and Shin-Yih Chen 161

Book Review
Microbiology of Extreme Environments (edited by C. Edwards),
by Rod Herbert 168

JULY

Workshop
Biosensors: the state-of-the-art,
by Anthony Turner 169
Environmental biotechnology,
by R. L. Crawford 170

Features
Mechanisms of mRNA decay,
by George Brawerman 171
The *in vivo* application of ribozymes,
by Matt Cotten 174

Reviews
RNA enzymes (ribozymes) as antiviral therapeutic agents,
by John J. Rossi and Nava Sarver 179
Phosphate control sequences involved in transcriptional regulation of antibiotic biosynthesis,
by Paloma Liras, Juan A. Asturias and Juan F. Martin 184
Immunotoxins: status and prospects,
by Robert A. Spooner and J. Michael Lord 189

Book Reviews
The Rhizosphere (edited by J. M. Lynch),
by Bart Lambert 194
Solid Phase Peptide Synthesis – A Practical Approach (by E. Atherton and R. C. Sheppard),
by Graham Kemp 194
A Practical Guide to Protein and Peptide Purification for Microsequencing (edited by P. Matsudaira),
by Michael Geisow 195

AUGUST

Workshop
Plant biotechnology goes commercial in Japan,
by Alfred Scheidegger 197

Undercurrents
Interspecific gene transfer: where next?,
by Julian Davies 198
Immobilization of animal cells in porous carrier culture,
by Denis Looby and Bryan Griffiths 204

Reviews
Transgenic fish,
by Thomas T. Chen and Dennis A. Powers 209

Enhanced transport and liquid membranes in bioseparations,
by John J. Pellegrino and Richard D. Noble 216
Agitators for mycelial fermentations,
by A. W. Nienow 224

Book Reviews
The Influenza Virus (edited by R. M. Krug),
by John Wood 234
Human Genetic Information: Science, Law and Ethics (edited by D. Chadwick, G. Bock and J. Wjelan),
by Thomas Breck 234
Fermentation – A Practical Approach (edited by B. McNiel and L. M. Harvey),
by Richard Sharp 235

SEPTEMBER

Workshop
Antigen delivery systems for analysing host immune responses and for vaccine development,*
by Roy Curtiss III 237

Feature
Yeast: the model 'eurokaryote'?,
by L. A. Grivell and R. J. Planta 241

Reviews
Engineering enzymes for non-aqueous solvents,
by Frances H. Arnold 244
Peptidomimetics and the template approach to nucleation of β-sheets and α-helices in peptides,
by Daniel S. Kemp 249
Antibody geometry and form; three-dimensional relationships between anti-idiotypic antibodies and external antigens,
by William V. Williams, David B. Weiner, Thomas Kieber-Emmons and Mark I. Greene 256
Site-directed mutagenesis: a tool for enzyme mechanism dissection,
by C. R. Wagner ad S. J. Benkovic 263

Book Reviews
Bacillus subtilis: Molecular Biology and Industrial Application (edited by B. Maruo and H. Yoshikawa),
by Anne Moir 271
Metals and Microorganisms (edited by M. N. Hughes and R. K. Poole),
by Don Kelly 271
Herbicides and Plant Metabolism (edited by A. D. Dodge),
by Elli Oxtoby 272
Packings and Stationary Phases in Chromatographic Techniques (edited by K. K. Unger),
by Laura Crane 273

* **See errata**

OCTOBER

Workshop
Continuous gene expression *in vitro*: the Spirin system,
by Suresh S. Rattan and Ole Kristensen 275

Undercurrents
Detection of bacteria by transduction of ice nucleation genes,
by Paul K. Wolber and Robert L. Green 276

Letters
Sense–antisense complementarity of hormone–receptor interaction sites,
by Jerry Slootstra and Eric Roubos 279
More about complementary hydropathy,
by Ricardo Renzo Brentani 281
Reply from Blalock 282

Reviews
New tools for protein sequence analysis,
by Fumio Sakiyama 282
Biochemical reactions in supercritical fluids,*
by Kozo Nakamura 288
Cryopreservation and the maintenance of cell lines,
by Brian Grout, John Morris and Mark McLellan 293

Book Reviews
Drosophila: A Laboratory Handbook (by Michael Ashburner); and
Drosophila: A Laboratory Manual (by Michael Ashburner),
by D. J. Finnegan 298
Metal Ions and Bacteria (by Terrance J. Beveridge and Ronald J. Doyle),
by Roger N. F. Thorneley 298

* **See errata**

NOVEMBER

Workshop
Electrospray ionization mass spectrometry – a powerful new analytical tool,
by Michael Geisow 301

Undercurrents
Training neural networks to analyse biological sequences,
by Steffen B. Petersen, Henrik Bohr, Jacob Bohr, Soren Brunak, Rodney M. J. Cotterill, Henrik Fredholm and Benny Lautrup 304
The biological production of protein polymers and their use,
by Joseph Cappello 309

Biotopics
Pandora's communications?,
by Michael Geisow 311
Moving lectures at the Protein Society Meeting, 1990,
by Michael Geisow 312

Features
The International Centre for Genetic Engineering and Biotechnology of UNIDO,
by Arturo Falaschi 314
The International Institute of Biotechnology,
by David J. Hardman 317
An overview of biotechnology information resources,
by Layne M. Johnson and Ronald A. Rader 318

Reviews
Soluble receptors for IL-1 and IL-4: biological activity and therapeutic potential,
by Charles R. Maliszewski and William C. Fanslow 324
Detection of genetically engineered traits among bacteria in the environment,
by R. W. Pickup and J. R. Saunders 329

Book Reviews
PCR Protocols – A Guide to Methods and Applications (edited by M. A. Innis, D. H. Garfield, J. J. Sninsky and T. J. White),
by H. Seliger 335
Postharvest Biotechnology of Flowers and Ornamental Plants (by D. H. Salunkhe, N. R. Bhat and B. B. Desai),
by J. N. M. Mol 335
1992 – Planning for Chemicals, Pharmaceuticals and Biotechnology (edited by Eurofi),
by J. N. Grindley 336

DECEMBER

Workshop
Biofilms, biofouling and biocorrosion,
by Kevin Marshall 337
Separations for biotechnology,
by Charles L. Cooney 338

Undercurrents
Altered gene expression in plants due to *trans* interactions between homologous genes,
by Richard Jorgensen 340

Feature
Safety in industrial microbiology and biotechnology: UK and European classifications of microorganisms and laboratories,
by C. H. Collins 345

Reviews
New approaches to the synthesis of antiviral nucleosides,
by David W. Hutchinson 348
Chaperonin assisted polypeptide folding and assembly: implications for the production of functional proteins in bacteria,
by Anthony A. Gatenby, Paul V. Viitanen and George H. Lorimer 354
Drought and salt tolerance: towards understanding and application,
by Kent F. McCue and Andrew D. Hanson 358

Book Reviews Supplement
Biotechnology – A Textbook of Industrial Microbiology, 2nd edn (by W. Crueger and A. Crueger),
by J. M. Woodley 363
Presentation of Clinical Data (by B. Spilker and J. Schoenfelder),
by R. Mather 363
Biotechnology in the Food Industry (edited by M. P. Tombs),
by J. D. R. Hille 364
Microbial Water Stress Physiology: Principles and Perspectives (by A. D. Brown),
by R. H. Reed 365
Applications of Biotechnology in Forestry and Agriculture (edited by V. Dhawan),
by B. H. McCown 365
Genetic Engineering and Biotechnology Related Firms, 9th edn: Worldwide Directory, 1990–1991 (edited by M. Sittig); and Biotechnology Guide Japan 1990–1991: Company Directory and Comprehensive Analysis (edited by Nikkei Biotechnology),
by M. D. Dibner 366
Biotechnology Japan (by M. D. Dibner and R. S. White),
by A. Scheidegger 367
Cryopreservation of Thin Biological Specimens for Electron Microscopy: Methods and Applications (by N. Roos and A. J. Morgan),
by J. Dubochet 368
Applied Biosensors (edited by D. L. Wise),
by I. J. Higgins 369
Microbial Mineral Recovery (edited by H. L. Ehrlich and C. L. Brierly),
by R. K. Poole 370
Biotechnology of Biomass Conversion (by M. Wayman and S. R. Parekh),
by B. S. Hartley 370
Methods in Molecular Biology, Vol. 5: Animal Cell Cultures (edited by J. W. Pollard and J. M. Walker),
by D. Knight, G. Shah and G. Gough 371

Books received 372

Errata

Biochemical reactions in supercritical fluids,
by Kozo Nakamura, pp. 288–292 353
Antigen delivery systems for analysing host immune responses and for vaccine development,
by Roy Curtiss III, pp. 237–240 353
